

KastleConnect®

Powered by PLAI

PLAI: THE INDUSTRY STANDARD FOR INTEROPERABILITY

PLAI, or Physical Logical Access Interoperability, is a unified and open solution for cross platform interoperability spanning physical access control, logical access control, and next generation commercial amenities.

PLAI CLOUD CONNECTOR

An open industry specification for securely connecting access control systems to other cloud-based systems.

PLAI AGENT

Software that connects the authoritative identity source (through LDAP) to the Physical Access Control System (PACS) using the PLAI Cloud Connector.

ROLES-BASED ACCESS

PLAI Agent simplifies the management of access for contractors and employees based on their function(s) within the organization.

EASY ON AND OFF-BOARDING

PLAI Agent enables convenient, secure and efficient one-step employee onboarding and off-boarding by granting or revoking access across many systems.
