

CYLINDRICAL LOCKS

THE MOST INNOVATIVE WIRELESS LOCK SOLUTION ON THE MARKET

Kastle and Schlage have partnered to simplify the availability of electronic access control to interior and office door locks throughout your facility. Enhanced security has never been more convenient and accessible as it extends into common building areas and office suites, all fully integrated with your Kastle access control system.

REAL TIME MANAGEMENT AND ADMINISTRATION

Add, edit, or revoke individual access and schedules to mechanical closets, restrooms, HR, finance and executive offices, IT rooms, file rooms, supply rooms, communications closets, or any controlled area within your space in real-time.

UNPRECEDENTED SECURITY AS AN AMENITY

Enjoy elevated security, flexibility and convenience by migrating away from the headaches of traditional keys and extending the reach of your existing access credentials to the next level of doors.

SIMPLIFIED INSTALLATION

By combining the cylindrical lock and credential reader in a single unit, and eliminating the effort of running wire to each individual door, enhanced security can be delivered and scaled with an astonishingly low total cost of ownership that efficiently delivers the most innovative wireless lock solution.

FUTURE-READY TECHNOLOGY

Kastle and Schlage have partnered to support both leading and rapidly evolving reader technology standards including prox, smart card and Bluetooth Low Energy, so your wireless lock solution is ready to support your technology progression.
