# THE KASTLE DIFFERENCE

Through managed security services, protection of your people and your property is handled for you. Managed security is the preferred method for keeping your environment safe because it offers the greatest convenience, affordability and assurance.

Kastle hosts your system, manages day-to-day activities and monitors security around the clock giving you:

## KASTLE'S TURNKEY APPROACH

### ACCESS CONTROL

Kastle Systems pioneered managed access control in 1972 and has been innovating ever since. Kastle's experienced team works with you to assign and manage credentials for your environment. We partner with you to establish policies and then custom design and install your system, maintain it, monitor it, and ensure it is always state-of-the-art. When it comes to managed access control, Kastle does it all.

### MOBILE PLATFORM

Kastle has created the industry's leading security platform featuring the world's first truly hands-free mobile credential. The KastlePresence platform extends beyond the mobile credential to include a personal alert feature, mass notification capabilities, data insights and unlimited mobile credentials. KastlePresence offers a unique blend of location-based features with cutting-edge security enhancements, extending security from the perimeter of your space to everyone's pocket.

### VIDEO SURVEILLANCE

Kastle has created another industry first with its video monitoring service. Today, most surveillance cameras are not watched. Our solution teaches the cameras to see by employing advanced, military-grade computer vision technology. Now, video systems can immediately detect security events and alert responders while being as easy to search as Google.

### FIRE & LIFE SAFETY

The need for Fire & Life Safety systems to operate properly is imperative. Because of the critical nature of fire monitoring, Kastle provides a comprehensive service to its clients to handle day-to-day monitoring and preventative maintenance. We employ 15 points of redundancy to ensure that, for critical conditions, you can count on Kastle.

### VISITOR MANAGEMENT

Kastle delivers the most frictionless visitor management experience in the industry. From the patented innovation that enables visitor registration directly from Outlook or Gmail, to user-friendly barcodes that are emailed to visitors for a more efficient check-in experience, Kastle's solution helps you securely increase your pre-authorized visitor rates and decrease wait times and congestion in your lobby.

### SECURITY SOFTWARE

Now you can increase your productivity through a simple, easy-to-use web tool that enables you to have greater system awareness, management and control. All you need is an internet connection and you are just a click away from accessing your critical security information, from anywhere at anytime.
