KASTLEVideo

VIDEO SURVEILLANCE: SIMPLY REDEFINED

The latest advances in high-definition cameras, cloud video recorders (CVR) and video analytics.

PATENTED BREAKTHROUGH

KastleVideo is a patented technology providing you an entirely new - and better - solution for video surveillance using video analytics software.

WORLD'S FIRST CVR

No complex hardware (DVR) is required on-site. To see your facility in real-time and review recent events, all you need is a password. Everything you need is in the cloud (CVR).

PROACTIVE NOTIFICATION

Set rules for what you care about. When something important happens, our software will push notifications to your inbox and the myKastle portal.

24/7 REMOTE ACCESS

From any web enabled device, at anytime, from anywhere, access your high-definition (HD) video cameras to see what's happening and review events.

VIDEO SEARCH

Need to go back and pull video evidence? Enter the time frame and our software takes care of the rest. You get the ten second clips that matter quickly and efficiently.

POWERFUL SHARING TOOL

The days of finding a CD and figuring out how to burn it from your DVR are over. Now, it's as simple and quick as click, save and email.

FEATURES	DVR	KASTLEVideo
