

KastleVideo for Construction Sites

INTRODUCING A BETTER WAY TO MANAGE, PROTECT AND PROMOTE CONSTRUCTION SITES

PROMOTE YOUR PROJECT

Incorporate HD Time Lapse Video to reveal and market your project through social media and other advertising channels. Commemorate your vision and your teams hard work in a meaningful way.

DEPLOY IN ANY ENVIRONMENT

No power, no problem. Kastle offers both 120VAC and Solar Powered models.

MANAGE ONE PROJECT OR HUNDREDS FROM ANYWHERE IN THE WORLD

Instantly know if construction materials have been delivered or whether certain trades showed up as promised. Perform remote safety audits to ensure proper workplace practices. Check on your projects at anytime from a smartphone, tablet, or computer using 4G Video transmission from your site.

PROTECT YOUR JOB SITE FROM THEFT AND VANDALISM LOSSES & REDUCE LIABILITY

After hours your system transforms into a Video guarding platform capable of detecting unauthorized people or vehicles and streaming incident video to Kastle's 24 x7 video monitoring center. Kastle will notify the police and persons that you designate to minimize the amount of time trespassers are able to remain on-site.
