

MobileSentry

PREVENT LOSS AND MONITOR JOBSITES FROM ANYWHERE, ANYTIME

PREVENT THEFT AND VANDALISM

Automatically detects trespassers after hours and streams video to Kastle's 24x7 monitoring center where operators can issue a live audio challenge to intruders, as well as notify local police.

MONITOR SUBCONTRACTORS & EMPLOYEES

You'll have a forensic record of all activity in view of the cameras - both day and night. And, if something is damaged on the jobsite, recorded HD video makes determining the responsible party an easy task.

EASILY DEPLOY IN ANY ENVIRONMENT

No power, no problem. Kastle's solution offers both 120VAC and solar powered models and is easy to install, remove and relocate.

PERFORM REMOTE VIDEO AUDITS

Monitor jobsite progress across multiple sites from any internet-enabled device (smartphone, laptop, or tablet) from anywhere, anytime.
