

Remote VideoGuarding®

FOR THE AUTO AUCTION INDUSTRY

PREVENT THEFT AND VANDALISM

Artificial intelligence enabled cameras automatically detect trespassers and stream video to Kastle's 24/7 operations center where remote officers issue live audio talk down and dispatch police.

REDUCE LIABILITY

From thefts that do not meet insurance deductibles to injuries and worker's comp claims, Kastle's VideoGuarding solution can reduce liability and mitigate risk.

ZERO FALSE ALARMS

Eliminate false alarms with Kastle's video verification. Our Operations Center will review all alarms and determine if they are actionable. If so, police are dispatched and audio talk down is issued.

REMOTE ENTRY/EXIT MANAGEMENT

After hours deliveries are not a problem with Kastle's virtual gate attendant. Remote personnel can grant ingress and egress, logging and reporting on this activity.

REMOTE YARD MANAGEMENT

See everything happening at your yard 24/7 with any smart device.

SAVE THOUSANDS IN OPERATING COSTS

Kastle's VideoGuarding solution does not sleep or steal. It sees everything in view of its artificial intelligence cameras while saving thousands of dollars each month compared to traditional security guards.
