

Kastle's Remote VideoGuarding

Cut Operational Cost.
Maintain Security.

Commercial real estate profits are tight.
Desperate tenants need rent reductions.
Building occupancy remains low.

**How many security guards do you need
to secure a low occupancy building?**

Remote VideoGuarding from Kastle
expands your on-site security
without increasing on-site guard staff.

Smart HD
Cameras

Cover more area quicker

LOW, OR NO CAPITAL INVESTMENT

Regular oversight and evaluation of the property by our U.S.-based Video Operations Center staff using your existing cameras or providing additional camera coverage if needed.

PREVENT THEFT AND VANDALISM

Video analytics detects activity and streams video to Kastle's 24/7 operations center where remote operators can issue live loudspeaker intervention and notify police if needed.

REMOTE PATROL

Video-based patrol can regularly inspect property for activity, covering a larger area quicker than a security guard, extending the reach of guard staff without added headcount.

ALARM/EVENT NOTIFICATIONS

Shortens response time and improves accuracy. Appropriately deploys security resources where they are needed.

We are Kastle Systems, the leader in managed security nationwide. We've been providing remote security for thousands of companies for over 40 years.

It's an easy, affordable set-up that quickly pays for itself.
