THE KASTLE DIFFERENCE

Through managed security services, protection of your people and your property is handled for you. Managed security is the preferred method for keeping your environment safe because it offers the greatest convenience, affordability and assurance. Kastle hosts your system, manages day-to-day activities and monitors security around the clock giving you:

A COMPLETE SOLUTION FOR YOUR NEEDS

Kastle brings together access control, video monitoring, visitor management and fire & life safety into a single solution for your business. You no longer need to work with multiple partners or struggle with separate systems.

COMPREHENSIVE SECURITY MADE CONVENIENT

A more secure system should also be one that makes it easy for you. Kastle maintains your hardware, keeps your software current, trains your people, administers security access, and even manages necessary IT infrastructure for you. We take responsibility while you stay in control.

LOWER TOTAL COST OF OWNERSHIP

By leveraging Kastle's expertise and scale, you increase your protection, lower your cost of ownership, and are free to focus on your own area of expertise.

THE FREEDOM TO WORK FROM ANYWHERE

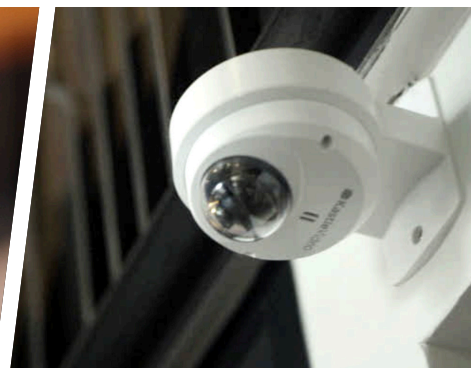

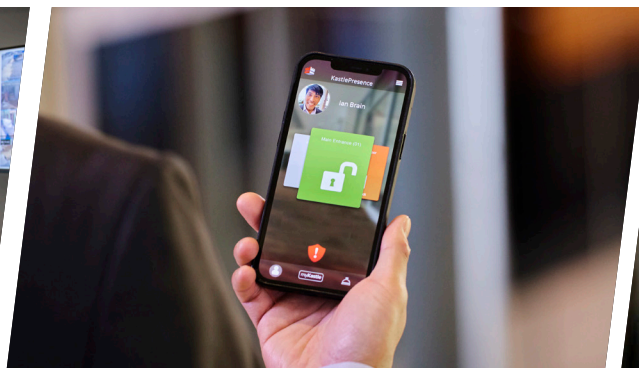

Our cloud-based solutions allow you to instantly access what you need from any device, anywhere in the world. Through an online portal or smartphone you can see who's in your space, lock or unlock doors, grant access, set schedules and comprehensively manage your facilities.

BUSINESS CONTINUITY WHEN YOU NEED IT MOST

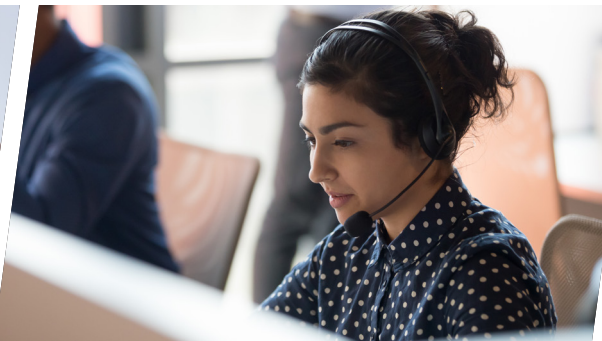

We know that security and safety systems are most important during times of emergency. As a result, your system has built-in redundancies and your data and security history is backed up continually in our secure facilities. If a disaster occurs, you keep operating with no loss to your business.

GUARANTEED SECURITY AND REDUCED RISK

Others sell systems. We guarantee your security. We detect, prevent and respond to events with technology that we maintain every day. By doing this, we are able to offer you the only security guarantee of its kind. Your risk is reduced, and your people and property are protected.

OUR MANAGED APPROACH

OUR INNOVATIVE SOLUTIONS

ACCESS CONTROL

Kastle Systems pioneered managed access control in 1972 and has been innovating ever since. Kastle's experienced team works with you to assign and manage credentials for your environment. We partner with you to establish policies and then custom design and install your system, maintain it, monitor it, and ensure it is always state-of-the-art. When it comes to managed access control, Kastle does it all.

VIDEO SURVEILLANCE

Kastle has created another industry first with its video monitoring service. Today, most surveillance cameras are not watched. The KastleVideo solution teaches the cameras to see by employing advanced, military-grade computer vision technology. Now, video systems can immediately detect security events and alert responders while being as easy to search as Google.

VISITOR MANAGEMENT

Kastle delivers the most frictionless visitor management experience in the industry. From the patented innovation that enables visitor registration directly from Outlook or Gmail, to user-friendly barcodes that are emailed to visitors for a more efficient check-in experience, the KastleVisitor solution helps you securely increase your pre-authorized visitor rates and decrease wait times and congestion in your lobby.

EMERGENCY MASS COMMUNICATIONS

The fastest method to get the word out in times of emergency is KastleAlert. Kastle's integrated platform enables you to leverage your existing infrastructure and enterprise-wide data to enhance security with mobile, crowdsourced Emergency Mass Communications.

MOBILE PLATFORM

Kastle has created the industry's leading security platform featuring the world's first truly hands-free mobile credential. The KastlePresence platform extends beyond the mobile credential to include a personal alert feature, mass notification capabilities, data insights and unlimited mobile credentials. KastlePresence offers a unique blend of location-based features with cutting edge security enhancements, extending security from the perimeter of your space to everyone's pocket.

SECURITY SOFTWARE

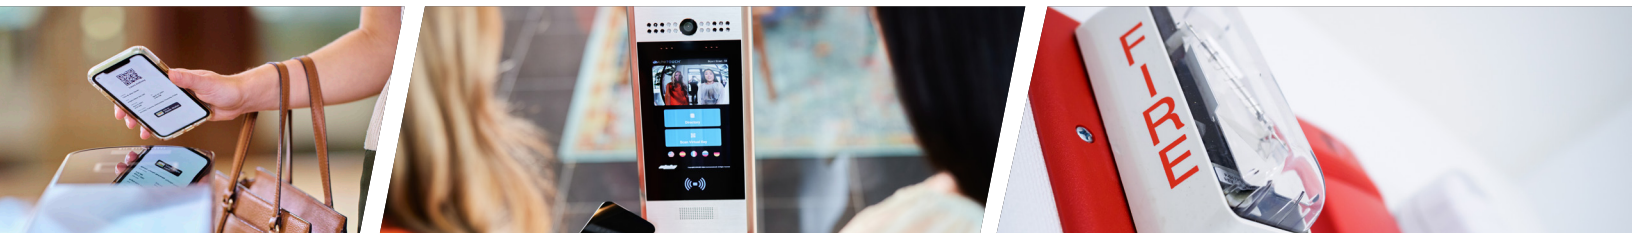

Now you can increase your productivity through myKastle, a simple, easy-to-use web tool that enables you to have greater system awareness, management and control. All you need is an internet connection and you are just a click away from accessing your critical security information, from anywhere at anytime.

INTEGRATED IDENTITY MANAGEMENT

Your business has an authoritative source where you store your employee identity information. That same system can work in harmony with your security system. By integrating two systems, it becomes easier to set up, automatically enroll new users, and ensure access rights are revoked when someone leaves. Kastle has helped the industry create an open standard where physical and logical security come together to do new things for you.

FIRE & LIFE SAFETY

The need for Fire & Life Safety systems to operate properly is imperative. Because of the critical nature of fire monitoring, Kastle provides a comprehensive service to its clients to handle day-to-day monitoring and preventative maintenance. We employ 15 points of redundancy to ensure that, for critical conditions, you can count on Kastle.
