

Smart Access for Your Office Suite

Kastle can secure your office and provide building access with the same mobile credential!

Kastle is the Leader in smart office access management, servicing over 41,000 business just like yours. Bring the next generation of office access on your smartphone right to your office door.

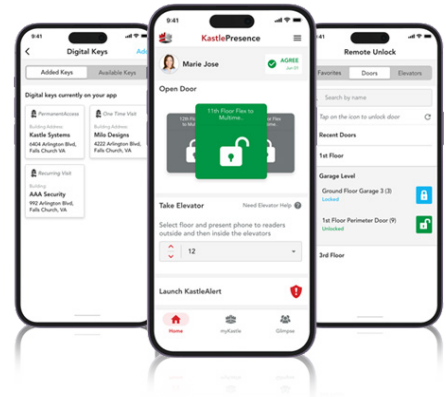

KastlePresence® - The Essential Office Upgrade

Hands-Free Mobile Access with Bluetooth-based credential on your smartphone:

- More secure than cards
- No lost credentials
- Easy to add/ revoke users
- Powerful space use data

Kastle provides enhanced security while increasing convenience and manageability with a single credential to enter the building and your office space. We manage the system so you can focus on work.

Options for Effective Office Suite Security

KastleVisitor®

Streamlined visitor registration:

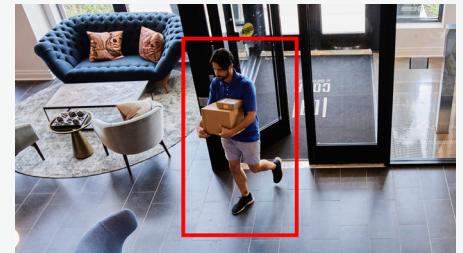

- Integrates with Outlook and Google Calendar
- Send a barcode to allow visitors to instantly check in

Identity Management

Single occupant roster connecting logical and physical access at the authoritative identity source:

- Fast onboarding & deactivation
- Syncs security to user identity
- Streamlines administrative process

KastleVideo®

Cloud-based video surveillance captures access history:

- Store clips of relevant events
- Access from anywhere online
- Reuse existing camera option
- Search video clips with ease

ADDITIONAL OFFICE SUITE OPTIONS FOR CONSIDERATION

Architectural Reader

Enjoy the sophistication of a reader that features *your* logo etched in glass. Perfect for main entranceways, Kastle architectural readers work with Bluetooth-enabled credentials, proximity cards, phone tags, and key fobs.

Phone Tag

Tired of lost keycards and fobs? This small access credential affixes to the back of your phone which you scan just like a keycard. For KastlePresence users, the phone tag provides access in the event your smartphone runs out of power.

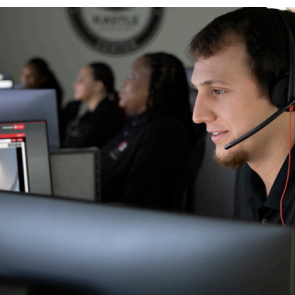

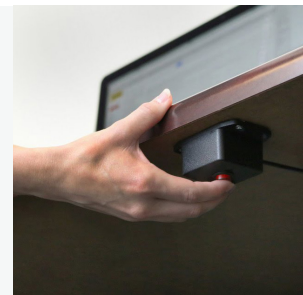

Point Monitoring

Because temperature changes, power failures, water leaks, or glass shattering can result in costly damage, Kastle offers monitored sensors that immediately send out an alert when abnormal activity is detected.

Panic Duress Button

At the touch of a button, an employee who is under duress can alert others that they need help. Within seconds, security experts at the Kastle Operations Center will act according to the client-directed protocol.

24/7 Monitoring

Count on your outsourced security partner to manage your system from design and installation to operating and monitoring. Our US-based Operations Center responds immediately to critical signals to ensure your office is protected.
