

Kastle VideoGuarding®

Need to expand security coverage - but adding more guards is not the answer?

Kastle VideoGuarding provides property-wide monitoring without the cost of adding guards.

Kastle VideoGuarding® can boost your security without increasing headcount on-site.

- » **Less Expense** - Video guarding costs 70% less than adding a single onsite guard.
- » **Prompt Response** - Video analytics can detect on-site activity and alert Kastle agents to view live video stream from our 24/7 operations center where our operators can issue live loudspeaker intervention.
- » **Remote Guarding** - Consistently cover a larger area than a single security guard, without added headcount.
- » **Stairwell Monitoring** - Observe stairwells or other community spaces for excessive loitering.
- » **Event Verification** - Alerts sent to police with video confirmation of incidents generate a 5X faster response than an alarm alone.
- » **Remote Patrol** - Video-based live patrol can regularly inspect property and assets for unwanted activity.
- » **Low Capital Investment** - We can use your existing cameras.
