Viewing Station
model CVView

KASTLE

In a compact form factor, the perfect viewing complement to a KastleVideo solution.

Reliable protection has never been this simple.

The KastleVideo Viewing Station (CVVIEW) is a local viewer for on-site cameras. Live video is direct streamed from cameras and gateways with low latency. The CVVIEW is equally suited for guard desks, reception areas and command-center display walls and is compatible with standard HDMI displays. Matrix views from 4 to 36 live H.264/H.265 streams can be programmed for display.

The Viewing Station is a managed device and is remotely configured through the KastleVideo Video Management System. Local configuration of cameras is also possible by using a user login which enables tours and custom views. CVVIEW also receives and applies software updates automatically and requires no on-site maintenance. It continues to function and display video from local cameras even during loss of Internet connectivity.

SYSTEM

Fanless embedded computer with 4GB RAM capable of 1080p resolution

Dual HDMI Output
Port 1: HDMI 1.4, 1080p resolution
Port 2: HDMI 2.0, 4K resolution
